SUMMARY

As a Software Engineer and Project Manager, I align business goals with technical execution to deliver impactful solutions. I am proficient in gathering requirements, translating business needs into actionable tasks, and prioritizing features based on value and strategic goals. I collaborate closely with stakeholders to ensure successful project outcomes, while focusing on planning, analyzing, and optimizing processes to deliver high-quality products and continuously enhance performance. I am passionate about expanding my knowledge and gaining experience to grow further in this field.

EXPERIENCE

• Project Manager and UAT Coordinator for Alfouad money transfer 2024 - present

1. Testing new systems to make sure they work correctly and adding needed features to meet the company's goals.
2. Creating project plans and coordinating with all departments while managing and prioritizing tasks to ensure smooth, high-quality delivery aligned with business priorities
3. Supervising banking system integration projects to ensure smooth and secure connections.
4. Coordinating communication between Alfouad's management, the software provider, and other parties to ensure clear communication and successful project results.
5. Collecting business requirements, setting priorities, and sharing them with the team as clear technical tasks.
6. Collaborated with QA and UAT teams to confirm feature readiness and ensure high-quality releases.

• Software Analyst and frontend developer for Al-tahhan center application - 2024

In this project, I played a crucial role in the requirement gathering phase, collaborating closely with clients to understand their needs and expectations also I took the initiative to design the user interface and user experience, and a part of the dashboard using React.

• Software tester (تطبيق لغتي هويتي) - 2024

Analyzed test results and prepared detailed reports to track progress and provide insights for future development cycles.

• Front-End developer for A TO Z APPLICATION - 2023

ATOZ application is a project in Damascus University. The application specializes in all aspects related to travel, including bookings, dining options. selecting Flutter for mobile app و creating an engaging UI/UX design to enhance user experience
